

conservation of environment

Archana Kadamanya

April 2025

1 Introduction

hey....! all today we are dicussing about the topic conservation of environment

First of all i am introducing myself i am archana k i am an electronic and biomedical engineering student from Asiet Kalady i am coming from Ernakulam , kerala

The environment is the foundation of life on Earth, providing the air we breathe, the water we drink, and the resources we use for shelter, food, and energy. However, increasing industrialization, deforestation, pollution, and over-exploitation of resources have led to serious environmental degradation. Climate change, loss of biodiversity, and the depletion of natural resources are just a few signs of the stress our planet is under.conservaion of environment is the duty of every citizen in the world

2 proposed content

to conserve the environment, we should focus on planting more trees, reducing pollution, saving water, and using renewable energy sources. Recycling waste and limiting the use of plastic can also make a big difference. Raising awareness through education and encouraging sustainable habits are key steps toward protecting nature.

3 conclusion

Environmental conservation is a shared responsibility that requires collective action from individuals, communities, industries, and governments. By adopting sustainable practices and respecting nature's limits, we can slow down environmental degradation and build a more sustainable and resilient future
